

Mnestix

The Open-Source AAS Ecosystem

Our expertise in Interoperability, AAS and DPP

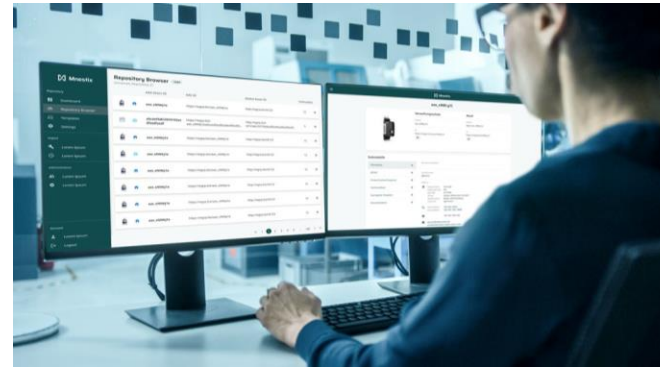

Pioneers of the Asset Administration Shell and the Digital Product Passport

Experience since 2019

One of the 1st productive projects

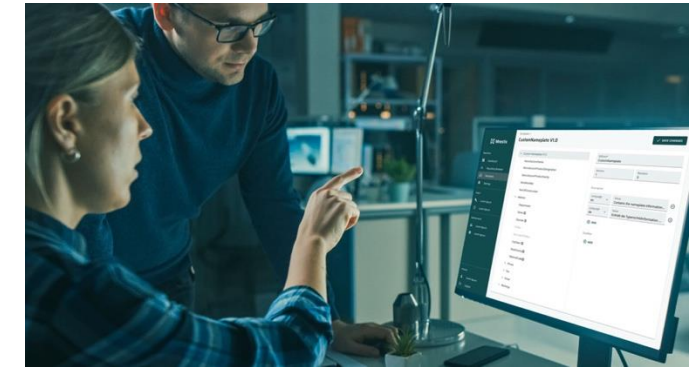

- Implementation of the Service Portal for WITTENSTEIN based on the Asset Administration Shell.

Open-Source Contributions

Eclipse Mnestix & Eclipse BaSyx

- Development of Eclipse Mnestix, an open-source browser and toolset
- Supporting Eclipse BaSyx and part of the research project BaSys4Transfer.
- Eclipse Foundation Member

Active Networking

We help shape the future

- Active member in organizations such as IDTA, the Open Industry 4.0 Alliance, and VDMA.
- Actively involved in the standardization of the DPP in CEN/CENELEC

Overview of Eclipse Mnestix Components

Your Browser for AAS Dataspaces

- Custom visualization of sub-models
- Booster for your DPP journey
- Browse through your AAS

Easily secure your Data

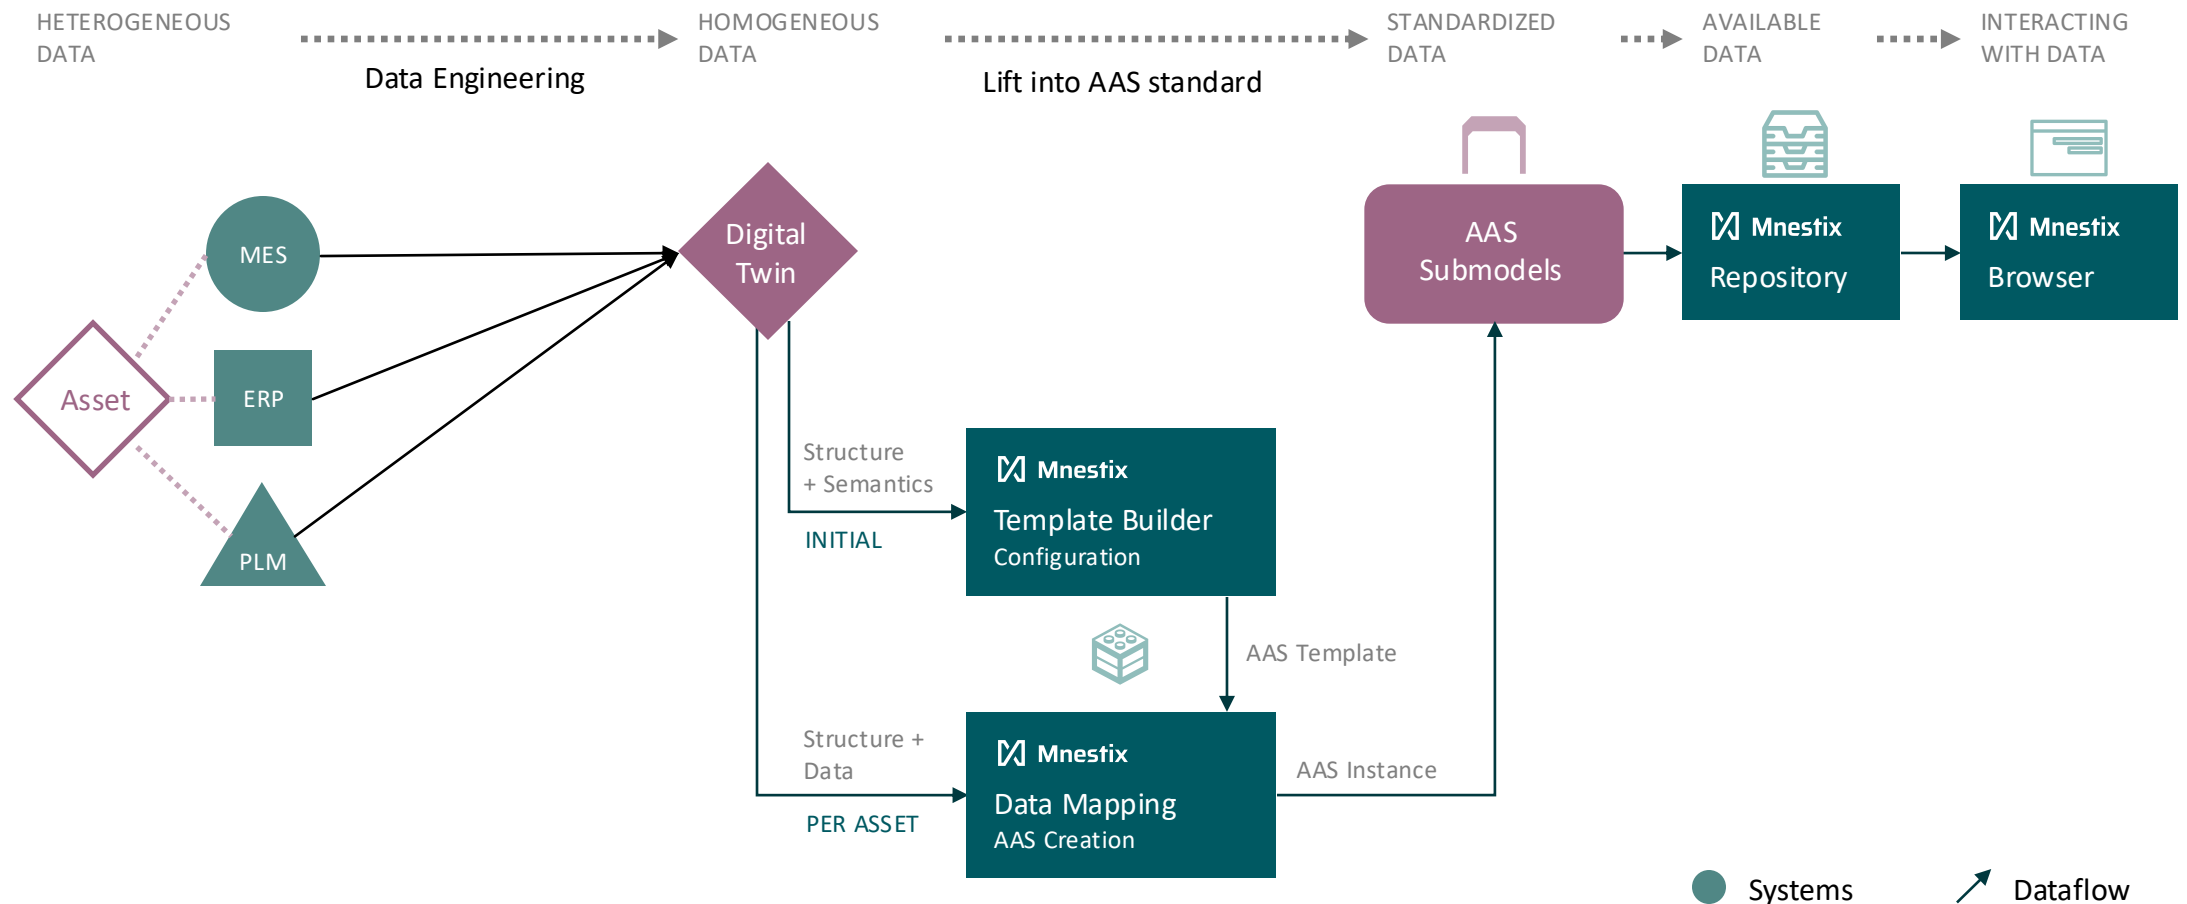

- Easily setup access to AAS repositories using an API key
- Know what changed using MQTT eventing

Business Features for You

- Integrate Mnestix ecosystem into your existing infrastructure
- Connect ETL services to Mnestix
- Create standard conform submodels

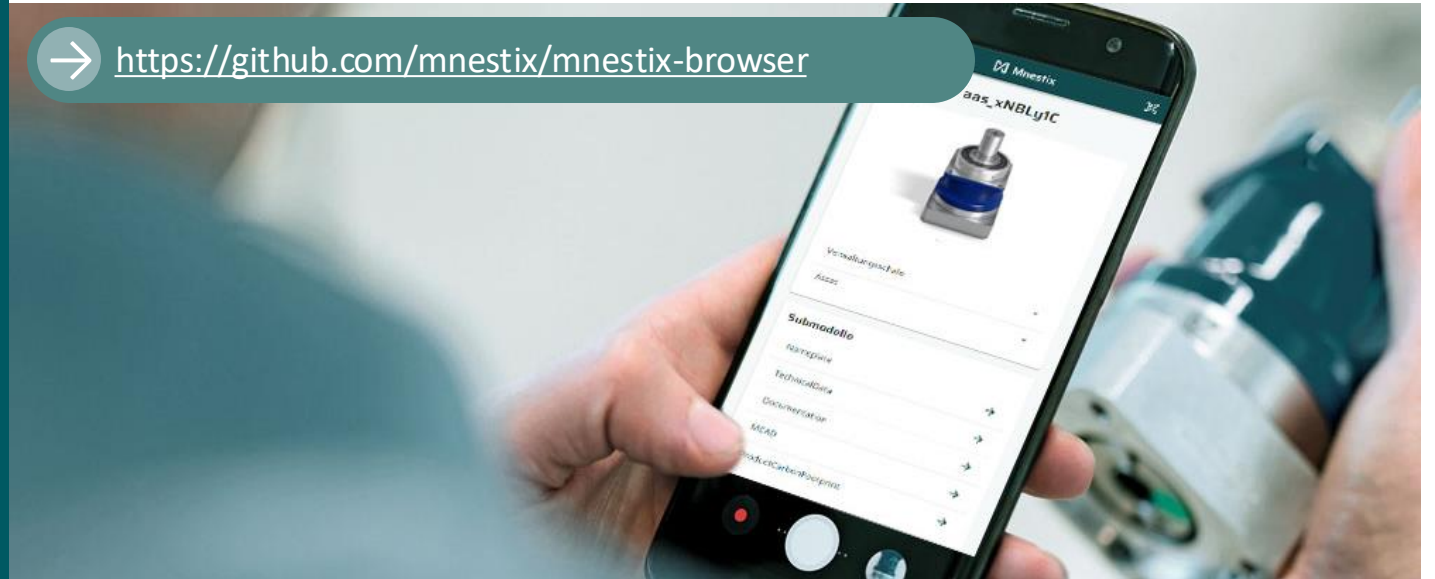

Mnestix – Booster for AAS Use Cases and the Digital Product Passport

Mnestix Browser

→ <https://github.com/mnestix/mnestix-browser>

Mnestix
Browser

- Usage of standardized API
- Quick setup
- Compatible with mobile devices
- Whitelabeling
- Putting user experience first

Mnestix Browser Features

Visualize AAS

Find all AAS for one asset
List all AAS in a repository

Custom Visualization of Submodels

Visualization of standard conform submodels
Visualization of non-standard conform submodels

AAS Dashboards

Compare content of submodels from different AAS
Create your own AAS dashboards easily

Try it out!

Template Builder & Data Mapping Service

 Mnestix
Template Builder
Configuration

 Mnestix
Data Mapping
AAS Creation

Mnestix API Features

Create Submodel Templates

Map dynamic data to a custom data JSON
Fill out static data

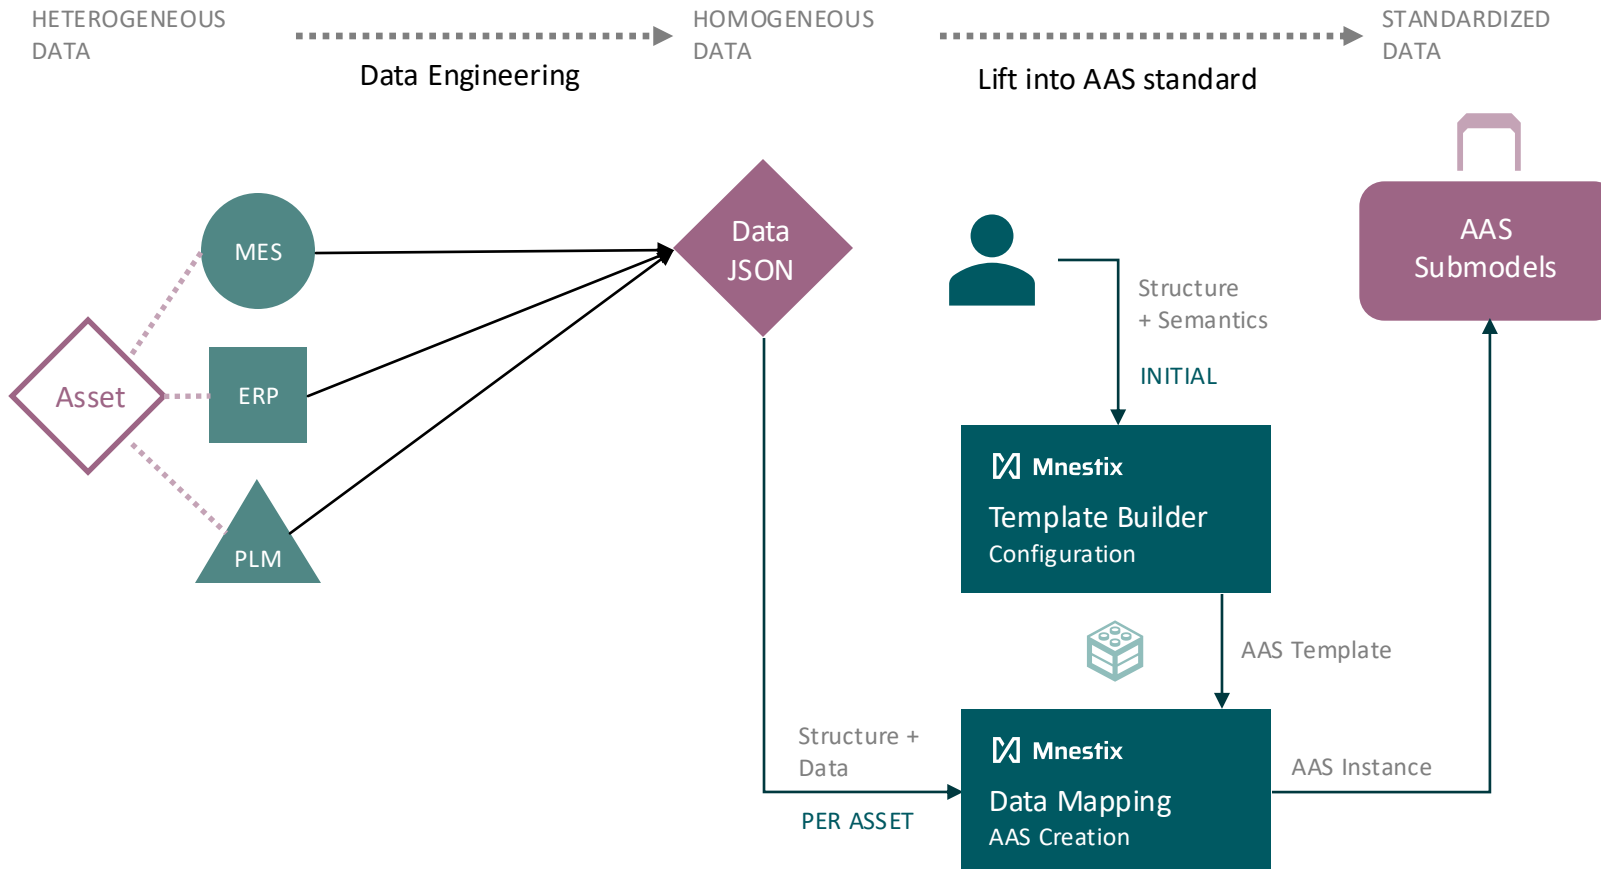

Create Standard-conform Submodels

Create with one request multiple standard conform submodels
that are added to your AAS

Business Comfort Features

Create Standard-conform IDs
Easily create multiple AAS

Mnestix – Booster for AAS Use Cases and the Digital Product Passport

Step 1: Creation of the data JSON

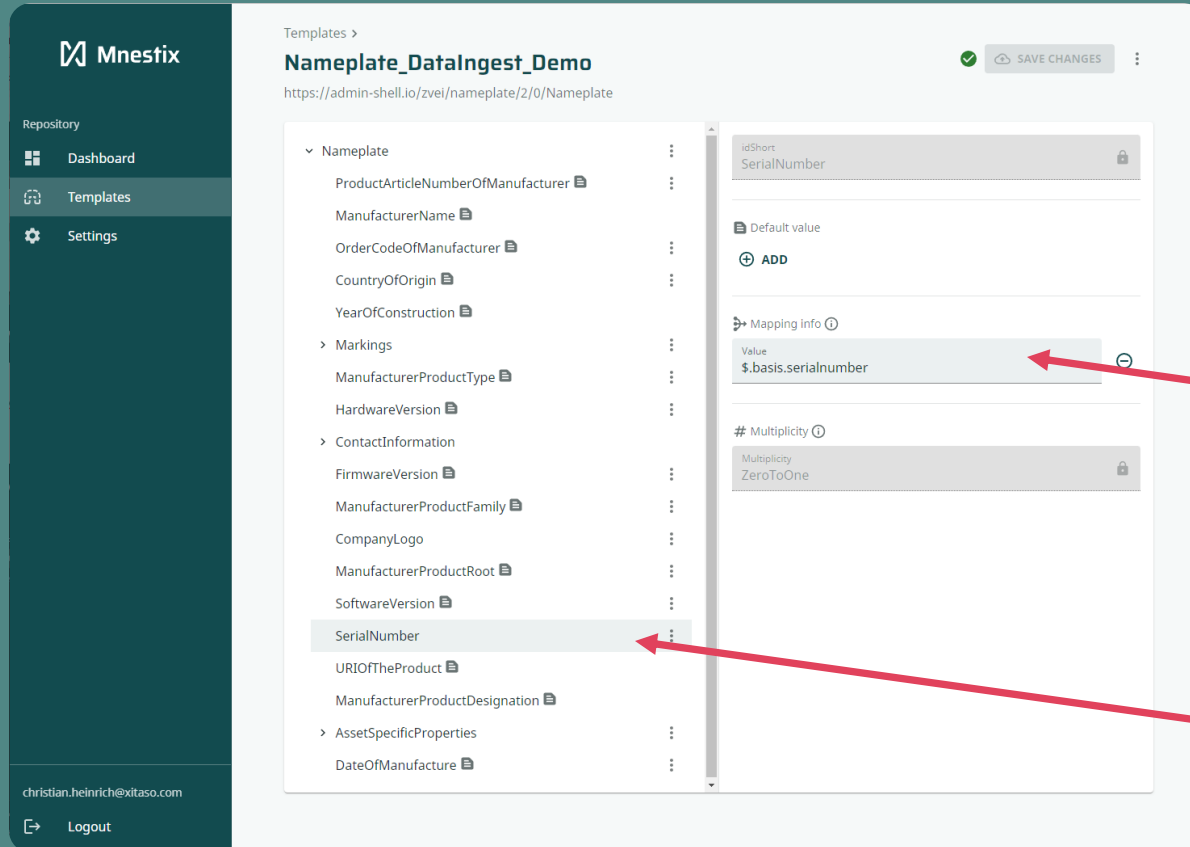

```
{  
  "basis": {  
    "serialnumber": "123",  
    "humidity": "111",  
  },  
  "orderSpecification": {  
    "orderNumber": "321"  
  },  
  "processPart": {  
    "replacementScrew": 1,  
    "additionalScrewPartsCurcumference": 3  
  }  
}
```

Step 2: Generate Submodel Template in Mnestix Browser

Confidential

27.11.2024

XITASO GmbH

```
{
  "basis": {
    "serialnumber": "123",
    "humidity": "111",
  },
  "orderSpecification": {
    "orderNumber": "321"
  },
  "processPart": {
    "replacementScrew": 1,
    "additionalScrewPartsCurcumference": 3
  }
}
```

Mapping info ⓘ

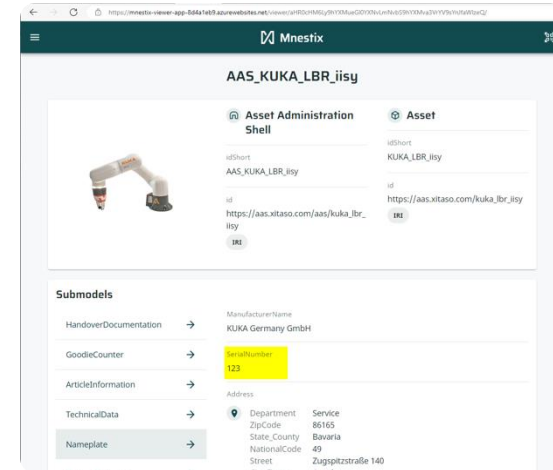

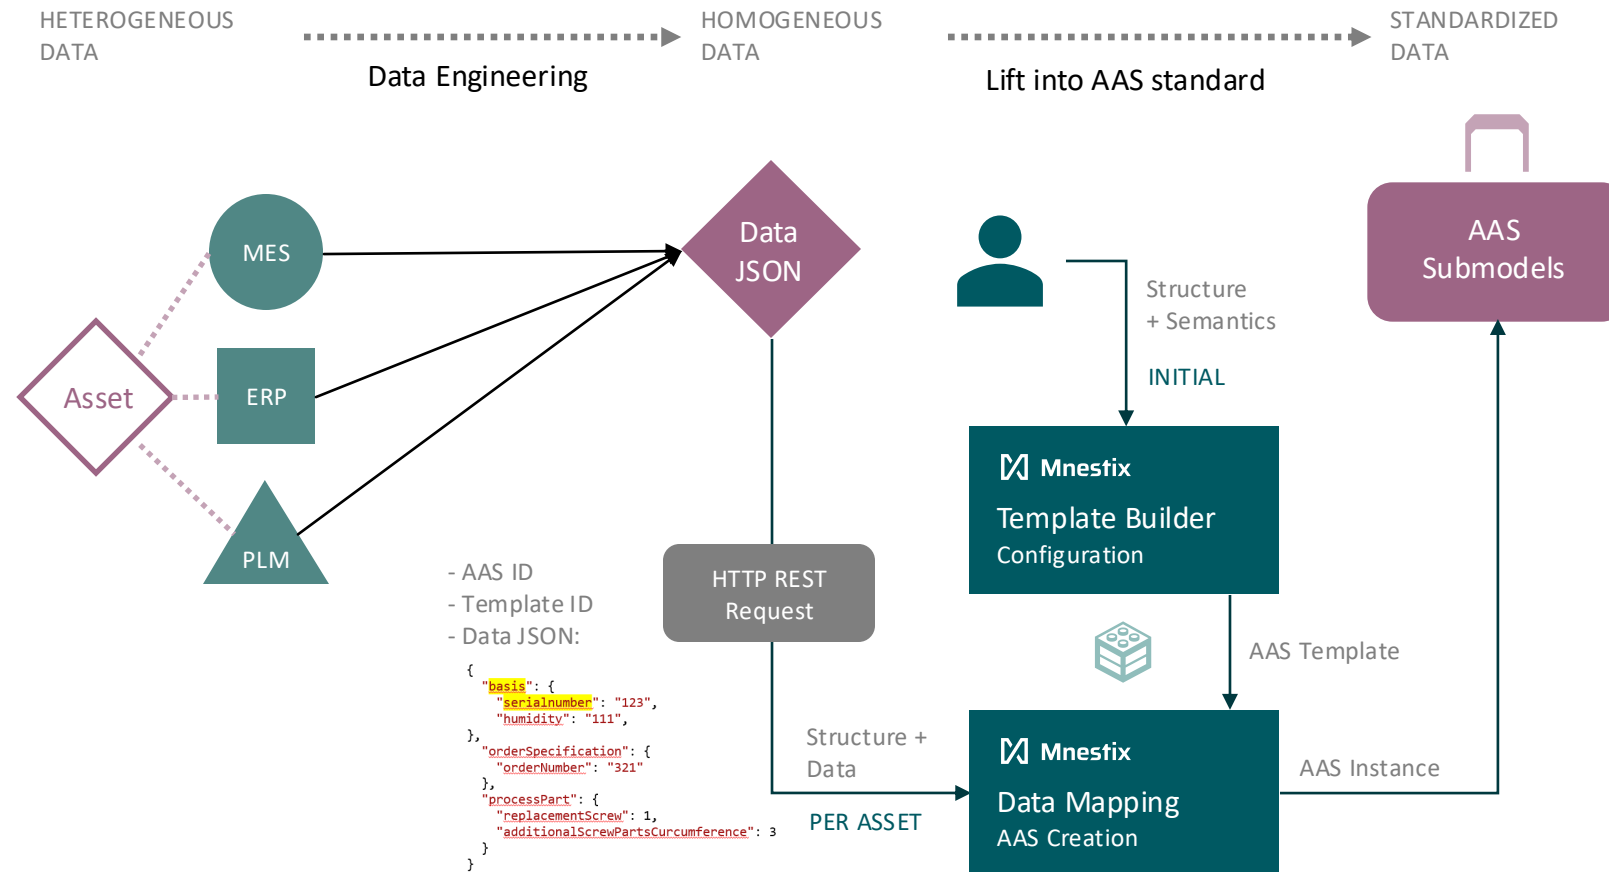

Value
\$basis.serialnumber

Path to the desired value in Data-Json.

SerialNumber

Property in Submodel Nameplate

Step 3: Create Submodels

Mnestix Community

Shape Mnestix to become the tool you need!

Radical collaboration is key

Oliver Ganser
VP BMW Group
Chairman Catena-X

It's about interoperability,

... and open-source software

Our offers for your solution boosted with Mnestix

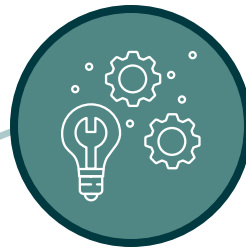

Onboarding Support

Get started quickly with Eclipse Mnestix & Eclipse BaSyx

Prototyping

Implementing individual shells for prototyping your use case

Consulting

- Target architecture of existing IT systems and their integration
- Process analysis
- Customer Journeys

Enterprise Edition

- Implementation of your ETL process
- Use case implementation
- Frontend customization
- Deployment support

Support

- Operations
- Maintenance
- Updates

Our Vision for Mnestix

AAS made easy!

Mnestix as an
open-source platform
provides an **easy way** to
implement industry use cases
using the Asset Administration Shell and
helps make this technology
understandable, applicable
and easy to use.
